MODEL I AIR-FED INCINERATOR

The Model I Air-Fed Incinerator is provided for those facilities requiring the capability of emergency destruction of classified documents at a maximum rate. Additionally this unit may be used for daily or weekly scheduled burn periods which will provide a maximum security capability not heretofore available. The incinerator will destroy all paper or paper products including film, negatives and those products of combustible nature manufactured of cellulose base materials. Given below is the technical data characteristics and requirements for the installation and operation of this incinerator.

Technical Data

Capacity: 283 240 pounds of material per hour.

Electrical Requirement: 3 phase, 60 or 50 cycle, 208, 220/380 or 208, 220/440 voltage is essential.

Space Requirement: Physical: 28 square feet (7 feet long, 4 feet depth). Functional: 4 inches should be added on each end and in the back for air space and the front should be cleared for loading and maintenance. Ceiling, minimum 8 feet 6 inches. Shipped in 7 pieces for individual facility assembly. Common tools are required for assembly and 4 to 5 personnel available to assist in lifting and handling.

Description: 42 inches outside diameter, 80 inches in height, requiring exhaust stacking to outside. Stack configuration (to be built at facility), welded, stainless steel construction with a minimum of 200 square inches in cross sectional area.
